

Make seed markers

Try making these colourful seed markers to keep track of which seeds you've planted where.

You will need: • plant canes, cut to about 20cm • playdough in a variety of colours • seeds • pots • soil

First, choose the right playdough colours to make your vegetable. Start squashing and pulling the playdough into the shape of the vegetable. Use different coloured playdough for the different parts of the vegetable.

Now gently push a garden cane into the bottom of the playdough vegetable. Leave the playdough to dry overnight.

Finally, put your seed marker into its pot to remind you which seeds you've planted.

Make different seed markers for your different seeds!
