

Make a Flick Book

To make this flick book,
you need: • a notebook
• some scissors • a glue stick

How to make it

1. Cut out the pictures above - as you cut each one out, write the number of the picture on the back of it to help you keep the pictures in the right order.
2. Using your glue stick, glue picture 11 to the last page of your notebook in the bottom right-hand corner.
3. Next glue picture 10 to the page before the last page, and so on.
4. Use your thumb to flick the pages of the book from the front to see Pedal throw the frisbee to Mixer!

To make another flick book, draw pictures of stick people on the pages of a post-it pad.
