

# DECORATE YOUR OWN WATERING CAN

There are plenty of fruits and vegetables you can easily grow at home. Whatever you grow you'll need a good watering can, so why not decorate your own?

You will need:

- 1 plain metal or plastic watering can
- a crayon if you use a metal watering can or a pencil if you use a plastic one
- a selection of acrylic paints
- PVA glue • brush

Lay out some newspaper before you begin. Painting can be messy!

First, draw your design on the watering can with a pencil or a crayon. If you make a mistake you can easily rub it out with an eraser.

Next, mix some paint with a bit of PVA glue. Then, starting with the lightest colours, use the paint to fill in your design and leave it to dry for a couple of hours.

If your watering can is a dark colour, you will need to paint a second coat. Leave it to dry overnight.

Finally, your own watering can is ready. Make sure you water your plants a little every day, especially in hot weather.
